

Senior Technical Fire Engineer – North West

Catchpoint (UK) Ltd are looking to recruit an experienced Fire Engineer to cover the North West of England.

This role requires an individual that can work using their own initiative and has a practical approach to undertaking tasks. The successful candidate will be conscientious and reliable with excellent interpersonal and communication skills and have at least 5 years work experience working with different types of fire alarms

Engineer Role & Responsibilities

- Sound level of administration and organisational skills
- Able to work away from home with overnight stays
- Flexibility to cover work during holidays, sickness cover & busy periods
- To cover out of hours and weekend callout on a rota system
- Complete work and paperwork to company and NSI standards
- Diagnose, repair and maintain fire alarm systems, identifying and replacing defective parts
- Act as technical advisor and report any issues affecting safe operation of alarm systems
- Test installations in accordance with manufacturer's guidelines
- Have a valid UK Driving Licence and adhere to the company's driving policy

The position offers:-

- Full time position (37.5 hour week)
- Salary of circa £28,000 depending on experience
- Holiday entitlement is 22 days per year plus bank holidays
- A company vehicle, mobile phone and laptop
- Support and training on products and systems when required
- Pension Scheme and Death in Service Policy (after 3 months service)

To apply please forward your current Curriculum Vitae to waynebaron@catchpointuk.co.uk
